

KHM Niveditha

6362656507 — nivedithakhm1111@gmail.com — LinkedIn — GitHub

Summary

Computer Science and Engineering (Data Science) student with hands-on experience in C and Python through academic projects. Skilled in developing basic software applications and working with Arduino, IoT, sensors, and electronics. Familiar with Git, GitHub, Overleaf, and AI tools, with a strong interest in learning and building practical technology solutions.

Education

Ballari Institute of Technology and Management (BITM)

B.E. in Computer Science and Engineering (Data Science)

Expected 2029

Ballari, Karnataka

Projects

Hotel Management System

C

- Developed a C-based hotel management system to manage room reservations and customer records.
- Implemented features to search, view, create, and cancel reservations with corresponding outputs.

Music Playlist Manager

Python

- Developed a Python-based music playlist manager to store and organize song details including artist, genre, and duration.
- Implemented functionality to view, search, and remove songs from the playlist.

Advanced Car Parking System

Arduino, IoT, Sensors

- Developed a smart parking system using Arduino, IoT, and sensors to detect vehicles entering and leaving parking slots.
- Implemented a display system to show the number of available and occupied parking slots in real time.

Capacitor-Based Emergency Light

Capacitor, Battery, Switches

- Built an emergency lighting system based on the principle of energy storage in a capacitor.
- Designed the circuit to provide lighting during power outages using the stored electrical energy.

Technical Skills

Languages: C, Python

Hardware & Technologies: Arduino, IoT, Sensors, Basic Electronics

Development Tools: Git, GitHub, Overleaf

AI Tools: ChatGPT, Claude, Gemini, v0

Certifications

AI Fluency for Students

Anthropic
